HAND POURED WITH NATURAL APRICOT AND COCONUT WAX
BY SCENTS OF SHAME CANDLE CO. OLDS, AB

NOT JUST YOUR EVERYDAY CANDLE!

Ok we get it... you may have to turn the candle around when the mother-in-law comes but will be worth it! Scents of Shame candles are made with superior ingredients sourced world wide (not kidding... world wide)! Our luxurious Coco Apricot Crème container candle wax is a vegan blend of natural apricot and coconut, and a minuscule amount of highly refined food-grade paraffin wax. It has a creamy white appearance and provides an excellent fragrance throw (both warm and cold). It exhibits an evenness of burn and wax consumption. These candles will burn approx 70-80 hours if put in a draft free location and burning for a maximum of 4 hours at a time. This coconut and apricot wax is gluten free, toxin free, paraben free, phthalate free and come from renewable sources. The entire blend utilizes only FDA approved waxes.

We also use a premium wooden wicks these wicks are made from sappy fruit trees and manufactured in the USA. These wicks unlike more common cotton wicks provide a beautiful clean flame with a soft crackling sound with no "mushrooming" of the wick.

The fabulous scents you will find in our candles are professional and premium grade and have been had selected to ensure that there is a fragrance for everyone! You have a choice of floral, musk, fruit, fresh, sweet and woody. Chances are you will buy the candle for the label but you will come back for the quality.

THERE YOU HAVE IT...

EVERYTHING YOU WANTED TO KNOW EXCEPT MY BRA SIZE.

CANDLE CARE...

Listen, I am not big on following rules, ask my parole officer.... JUST KIDDING, but in this case it is important to follow a few candle/wooden wick guidelines. If your candle is still a virgin (brand spankin' new) it may be as temperamental as a two year old. With these finicky little guys, we recommend lighting them the first time with a BBQ lighter or a hand held lighter. Hold the flame at the base of the wick for about 15-20 seconds if you can, you may have to try lighting them a few times.

Once you have your candle lit for the first time try to keep the candle burning for up to 2 hours or until the melt pool has reached the sides of the container to insure a consistent burn without tunneling for the rest of the candle life. Once you have done this, it should be smooth sailing! When you relight your candle make sure your wick is nice and cleaned up before lighting. Gently tap off any excess charcoal bits on the wick from the previous burn.
