*Smells like intimidation and sarcasm*  
HAND POURED WITH NATURAL APRICOT AND COCONUT WAX  
BY SCENTS OF SHAME CANDLE CO. OLDS, AB

Ok we get it... you may have to turn the label around when the mother-in-law comes but will be worth it! Scents of Shame products are made with superior ingredients sourced world wide (not kidding... world wide)!

### NOT JUST YOUR EVERYDAY CANDLE!

Our luxurious candles are made from Coco Apricot Creme container candle wax that is a vegan blend of natural apricot and coconut, and a minuscule amount of highly refined food-grade paraffin wax. It has a creamy white appearance and provides an excellent fragrance throw (both warm and cold). It exhibits an evenness of burn and wax consumption. These candles will burn approx. 100 hours if put in a draft free location and burning for a maximum of 4 hours at a time. This coconut and apricot wax is gluten free, toxin free, parabien free, phthalate free and come from renewable sources. The entire blend utilizes only FAD approved waxes.

We also use a premium wooden wicks these wicks are made from sappy fruit trees and manufactured in the USA. These wicks unlike more common cotton wicks provide a beautiful clean flame with a soft crackling sound with no "mushrooming" of the wick.

### OUR SCENTS!

The fabulous scents you will find in our candles are professional and premium grade and have been hand selected to ensure that there is a fragrance for everyone! You have a choice of floral, musk, fruit, fresh, sweet and woody. Chances are you will buy the candle for the label but you will come back for the quality. All of our fragrances are made with a high volume of essential oils and have rich combinations of top, middle and base notes.

### OUR SOAP!

Don't judge when people come out of the bathroom smelling their fingers! This hand soap is made with a organic pure castile liquid base and scented with all the Scents of Shame premium grade fragrances. The natural oils will leave your hands feeling smooth and soft.

### OUR SPRAY!

When you don't have time to light the candle and the company just rung the door bell. Our Room & Linen Sprays are perfect for spontaneously scenting anywhere, from closets and cars to powder rooms and bedding. With a commitment to natural and organic ingredients, our room sprays offer a delightful sensory experience while supporting sustainable practices.

## CANDLE CARE...

Listen, I am not big on following rules, ask my parole officer.... **JUST KIDDING**, but in this case it is important to follow a few candle/wooden wick guidelines. If your candle is still a virgin (brand spanking' new) it may be as temperamental as a two year old. With these finicky little guys, we recommend lighting them the first time with a hand held lighter. Hold the flame at the base of the wick for about 15-20 seconds if you can, you may have to try lighting them a few times.

Once you have your candle lit for the first time try to keep the candle burning for up to 2 hours or until the melt pool has reached the sides of the container to insure a consistent burn without tunneling for the rest of the candle life. Once you have done this, it should be smooth sailing! When you relight you candle make sure your wick is nice and cleaned up before lighting. Gently tap off any excess charcoal bits on the wick from the previous burn.
